

CREDENTIALS

B.S., Neuroscience and Africana Studies with Honors, University of Pittsburgh

MD, University of Pittsburgh School of Medicine

Residency, Duke University Medical Center

Pediatric Neurosurgery Fellowship, Baylor University - Texas Children's Hospital

Fellow of the American Association of Neurological Surgeons

Assistant Professor at the University of Central Florida School of Medicine

“As a neurosurgeon, I am trained in the diagnosis and treatment of disorders involving the brain, the spine and the spinal cord, nerves as well as intracranial and intraspinal vasculature.

Since July 2008, Orlando is the place I call home. My personal and professional quest has been to use my education, training and most importantly love for children to help them get through the life altering challenges that brain and spine pathologies are. I simply want to provide kids and their families with a total care package; One that mixes skills, technology and compassion in a welcoming environment.”

- DR. KEYNE JOHNSON
Board Certified Neurological Surgeon

SPINE SURGERY

Is surgery for neck or back pain necessary? Sometimes. It is reasonable to consider spine surgery if the pain has not diminished after months of non-surgical treatment, if pain does not respond to medication, or if the patient is unable to complete basic daily activities; it may be the only option.

DR. JOHNSON TREATS ALL KINDS OF SPINAL DISORDERS INCLUDING:

- CERVICAL SPINE INSTABILITY
- SCOLIOSIS
- DISC DISEASE
- SPINA BIFIDA
- SPASTICITY

Dr. Johnson has presented her research at numerous national meetings, is published in numerous peer reviewed journals and has trained internationally.

BRAIN SURGERY

As a neurosurgeon, Dr. Johnson addresses the prevention, diagnosis, treatment, and rehabilitation of disorders which affect any portion of the nervous system. This includes the brain, spinal cord, peripheral nerves, and extra-cranial cerebrovascular system.

DR. JOHNSON TREATS ALL KINDS OF NEUROLOGICAL DISORDERS INCLUDING:

- EPILEPSY
- BRAIN TUMORS
- VASCULAR MALFORMATIONS
- MOYAMOYA
- CRANIOSYNOSTOSIS

Dr. Johnson has had extensive training in treating many types of brain tumors including those that are malignant and those in very eloquent and delicate areas of the brain.

She has performed endoscopic surgery, which is a minimally invasive surgical technique for removal of brain tumors. Dr. Johnson also works closely with the neuropsychologists, neurologists, neuro-oncologists, radiologists, pathologists, neuropsychologists and any other discipline needed in caring for the patient.
